Cleaning Instruction and Maintenance

UltraGloss acrylic foils come with a protective film, be sure not to remove this film until work has been done completed as this will initiate a 72 hour curing process.

Clean using a non- abrasive soap or detergent in warm water with a soft cloth or chamois. Be sure to wipe any spills or residue immediately, as they are moisture resistant.

Minor scratches can be easily removed by hand with selected liquid polishes and a soft polishing cloth. Never use cleaning products containing alcohol, solvents, abrasives, acetone, paraffin, petrol, pinewood or oils or glass cleaners as this will only damage the surface.

Following these caring steps will ensure your surface stays beautiful for years to come.

Specification

UltraGloss is the high gloss acrylic foil which provides a superior appearance and modern finish. UltraGloss is a simple, easy and cost effective way. Designed and manufactured in Korea and exported globally. UltraGloss is suitable for both kitchen and bathroom applications.

Environment

UltraGloss is designed to have as minimal impact on the environment and is wholly manufactured under Environmental Management System, which has been independently accredited to ISO14001. UltraGloss is manufactured and then laminated without the use of any VOC's or other harmful emissions.
