Surfaces Lockers Cabinets
Trolleys

Wall Cladding & Partition

Hospitality & Restaurant Tables

Counter Tops • Doors
Cubicles • Lockers • Cabinets

100%
ACRYLIC

CLEANING INSTRUCTION AND MAINTENANCE

EUROOM High gloss acrylic laminates comes protected with a high-quality protective film which is only removed at the completion of all installation work. After the protected film is removed, there is still presence of solvent from the adhesive • Shake it well coating of the protective film on the surface and lightly spray of the high gloss acrylic laminate. An on the surface electrostatic charge is built-in and attracts dust onto the surface of the panel.

During this time, the acrylic laminate surface also cures out under the influence of normal air humidity. Under normal circumstances, the 'Curing' process will take approximately 72 hours for the surface to be totally cured. In order to speed up the process, we recommend cleaning the high gloss surface with COLIN Glass Cleaner and soft Micro fibre cloth.
